

## Your PCB Debit Card & Apple Pay®

Apple Pay® is a convenient way to pay with your PCB debit card. With Apple Pay, you can simplify the way you shop by adding your PCB debit card to the Wallet app (formerly the Passbook app) on your eligible iPhone®, iPad® or Apple Watch®. Now you can easily check out at many of your favorite retailers with just the touch of your finger.

### Shopping Made Simple

- By adding your card to Apple Pay, there's no need to reach for your wallet when making purchases in-store or online. Apple Pay also lets you make purchases quickly and easily within many of your favorite mobile apps that include the new feature.
- Best of all, with Apple Pay you still get all the rewards, benefits and protection your PCB debit card already provides.
- When you make a purchase using Apple Pay, all transactions are monitored by the same PCB security & privacy that protects your PCB debit card.
- Debit card numbers are not stored on your device and never shared with the merchant.
- Apple Pay is accepted in more than a million stores.

### Let's Get Started

- It's easy to add your PCB debit card to Apple Pay. Open the Wallet app on your iPhone model with Face ID or Touch ID (except for iPhone 5s). Customers can also add their PCB debit cards to Apple Pay on the iPad Pro, iPad Air, iPad and iPad mini models with Touch ID or Face ID. Visit [Apple Pay](#) to see the latest compatible devices.
- Apple Watch users can add cards to Apple Pay by opening the Apple Watch App (paired with an iPhone 5 or later).
- If you already have a PCB debit card on file with Apple iTunes®, you can quickly import it into Apple Pay by entering the security code on the back of your card.
- To add a PCB debit card that is not in iTunes, enter your card information into the appropriate fields. Apple Pay will perform a simple validation with PCB before the card is ready to use. You may be asked to contact PCB to finalize validation. Please call: 800-667-5202.
